

Metallurgical Technician

About the Role

Schedule: Monday to Friday, 8 hours per day

Position Reports To: Senior Operations Metallurgist

Position Overview: Working within the Metallurgy team, the incumbent will support quality metallurgical reporting, process control and improvement projects.

Key Responsibilities

- Putting safety first in the planning and execution of all works;
- Identifying, evaluating, and coordinating execution of operational and/or capital projects to improve product quality and process efficiency;
- Providing timely and accurate metallurgical accounting information;
- Ensure reliable control of the mill process using the on-stream analyzer, particle size analyzer, density gauges and auditing of sampling methods;
- Designing and executing test programs to optimize gravity, grinding, flotation and tailings dewatering circuit performance.

Qualifications

Required:

- A Bachelor's Degree in a technical field
- Previous experience in gold and/or base metal processing plant(s)
- Minimum 4 years of experience in an industrial, laboratory or technical consulting environment. Relevant co-op experience may be included.
- Strong problem-solving skills and an emphasis on safety
- Ability to both lead teams and be a contributing team member
- Proficient in MS Excel

Desirable:

- Hands-on experience with laboratory-scale mineral processing equipment
- Experience using JK SimMet or similar balancing/simulation software
- Involvement in technical/professional associations and conferences
- Experience with interpretation and application of mineralogical data
